### CHICKEN POX

We have multiple cases of Chicken Pox in school. This is a really common virus which is infectious.

There are usually 3 stages of infection:

- Small spots appear. These can be anywhere on the body.
- Spots become blisters.
- Blisters become scabs.

Children might also have a temperature, lose their appetite or appear generally unwell.

Children need to stay off school until the blisters have all scabbed and the child is feeling well enough. This is usually 5 days after the first signs of infection.
