From plant to plate!

Class 1 did a fantastic job of looking after the cress plants. They grew really quick and were ready to eat at the end of May. The children in Class 1 presented the plant to our cook who served it up in our salad bar. Everyone enjoyed trying it and it was quickly all gone! Well done to Class 1!

Our SNAG did a great job of re-potting the germinated courgette plants one lunchtime. They needed more space to grow big and strong!

Our SNAG asked each class for their ideas of how to make our lunch times a calm and positive eating experience. We are now trialing the top 4 ideas. Have colourful posters on display, Let the sunlight flood in, play calm music and have lunchtime ambassadors to welcome diners and help them.

Look at them now!

Look at our spring onion, courgette and carrot plants now! We are thrilled that they are all growing so well. Hopefully they will be ready to eat soon!
