Counting Money

Dragons like to count their money. Help the dragons count their money…

Pick a number… use the 100 square. (Y1 up to 30 and Y2 up to 100).

34p How many 10s and how many ones? "There are __3__ tens, which is __thirty__, and __4__ ones, which is 4. This is makes 34p altogether." 30p + 4p = 34p	
Use real coins or cut out the coins on the next sheet to help you.

Can you partition numbers in different ways…
You could use Base 10, straws or coins to help.

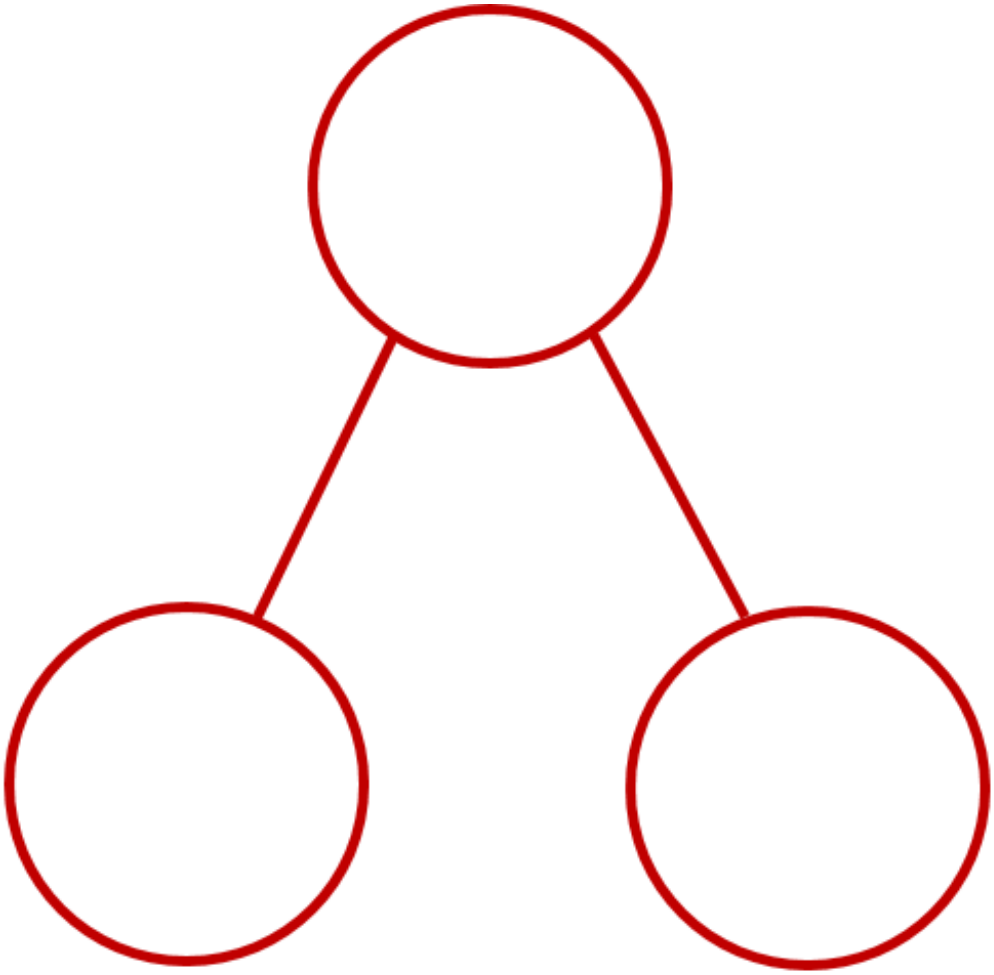
34 = 30 + 4

34 = 20 + 14

34 = 10 + 24

What do you notice?

What is the same and what is different?



ONE PENNY
TEN PENCE
